Abstract

In this paper, we consider the symbolism of the Book of Foundation image. We've determined that the numbers coincide with Astrotheology Mathematics. It is important because it shows that the Ancient world knew a lot more physics than we knew until now.

Keywords: Babylon; Jews; Daniel; Physics
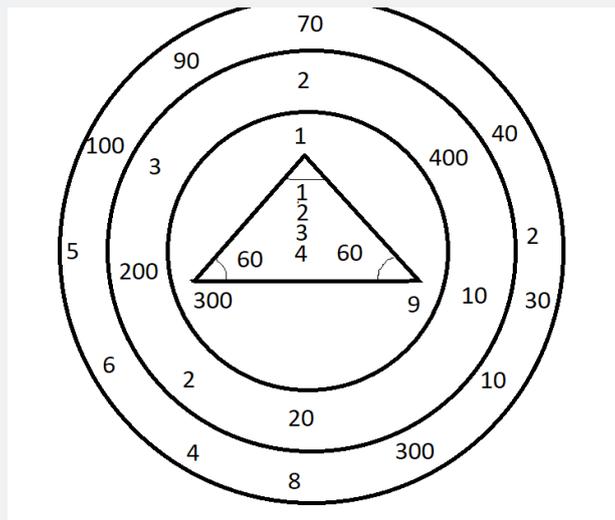

Introduction

Figure 1: The Universe and God.

In continuation of our theme that the Ancients of 6th Century Babylon knew far more physics than previously held, we provide an examination of the Jewish motif Sefer Yezriah (The Book of Foundation). [1] Judaic Mysticism. The Book of Foundation contains the symbol that dates from the 6th Century B.C. The Jews we in exile there in that period. They provide a picture of an equilateral triangle surrounded by Hebrew Letters which all have an alphanumeric equivalent (translation (Figure 1)) [2]. Figure 1 is God and the Universe according to reference [1]. "These letters and corresponding numbers of the Hebrew alphabet make up the entire model of the name of God and the principles that govern the universe.

In the centre, 1,2,3,4 make up Pi. Pi=3.14159~3.142 -> 1,2,3,4

In the first ring, 300+1+9 ~31.8 Hz ->Frequency of the human mind=1/Pi=31.8.

In the second ring, 3+200 ->Dampened Cosine Energy =Y=202.

400+2=402 -> Reynold's Number

20+10+2=32~31.8Hz -> Frequency of the human mind.

In the third ring,

90+100+5=195~196=Infinit6+4+8+300=318=Frequency of the human mind.

10+30+2=0.4233=Pi-Base e=0.4233 -> Resistance to mass formation.

40% 0f a cycle is 1 radian =t=1

The Third ring adds to 6.65~6.66=G

The Second Ring adds to 337~338 Another important number in Astrotheology. The only number unaccounted for is 70

at the top of the third ring. It is the 70 weeks of Daniel. The Book of Daniel was likely written in the 6th Century BC when the Jews were in exile there [3].

Conclusion

This ancient diagram illustrates that the Jews knew a lot more physics than previously thought -even more that known today henceforth. The Jews likely got this theoretical physics from the Babylonians who built the Hanging Gardens of Nineveh also based on Astrothoelogy Math.
