## Basics of the Cosmological Theory of Information and Vortex Field Theory of Momchil Dobrev

1991 Momchil Dobrev creates Cosmological theory of information [1] and theory of vortex fields [2] - the basis of everything. In the same year Momchil Dobrev created two free energy generators using the theoretical and practical solutions of both theories, creating prototypes, but actually refusing to start regular production because he knows that all scientists and inventors create such generators soon after they are killed.

The real vortex theory proves the existence of swirling fields in the fabrication of matter at the lowest to the highest level, starting from the atomic structure, to the construction of star systems, galactic systems of the universe. On the other hand, the vortex fields are also present in the construction and functioning of the human body.

On the other hand, the cosmological theory of information proves that vibrations are the basis of the existence of all objects in the universe and man in particular. Even at the cellular level there are precisely defined vibrations of precisely defined frequencies and frequency spheres. Each cell, even every organ vibrates with exactly the same frequency when it is in a state of

health and certain other ones when it is in a disease state. The deviation from the interval norm of the "healthy" body vibrations proves the opposite that the body is sick.

Swirl fields actually carry, distribute, create both information and energy. There is actually a conversion of information into energy and vice versa. In fact, on the basis of the theory of the vortex fields, the passage of the material in the process of materialization and dematerialization is undisputed, in which the processes do not lose the information. On the other hand, the vortex fields are the basis of matter and antimatter. Swirl fields emit vibrations precisely defined and at specified intervals. This is the relationship of the vortex fields with the cosmological information theory.

## Three distinct principles apply to each swirling system

There is a force that is at the heart of the whirlwind - in its center, and it controls the entire structure. For each structure swirling forces that cause the structure to strive for center, swirling forces that cause the structure to strive for external propagation, and a separate force that prevents objects from the structure from leaving the structure itself - that is, has the force of limiting

the size of the structure. Vortex structures are also hurricanes. In the center of hurricanes is peace. There are chakras in the human body both at the physical level and at the other two levels, which besides supplying information and energy to the respective glands and levels and organs at these levels, but it also raises the energy to the highest level. The whirling structure that radiates the corresponding vibration - its section.

**Light is a vortex:** Each electromagnetic wave is a whirl, the point at which both the electric field and the magnetic field are the zero point. Moreover, the space generating the vortices is geometrically based on the golden section, the numbers phi and pi. As a consequence of the cosmological theory of information are the pyramids among which the pyramid of the Hypo. This geometric figure represents a field generator in which the antigravitation, metatalization and dematerialisation processes are generated at the respective height points with corresponding coaxial frequency generation or so-called vibration. At the corresponding point of this geometric structure, a precise vibration makes a connection with the spiritual world. The very geometric structure generates a field structure with specific properties and qualities. At a specific point in the structure of the pyramids with countries in which there are golden coincidences, there is no process of rotting, there is dehydratation, a process of energy influence even on metallic metal objects. Apart from that, these pyramids actually create field structures to balance the energy field of the Earth, ...

**Electromagnetic wave is a whirlwind in a straight line:** A basic element in the cosmological theory of information is also to note the basic principle. When an "entrance door" has a precise vibration to enter this door, it must generate the same vibration frequency spectrum as the corresponding door. This applies to each cell for each process, for each object Only when the frequency spectrum of the "front door" and the object or the information that can and wants to go through this "door" the energy and the in-house information can enter through the "front door". In the event of interference, the entry through the "entrance door" occurs. Each number, each letter, radiates a certain frequency spectrum. Every word does the same, here the coincidence is enormous: is a sacred number that corresponds

**Resurrection as A Procedure Proven by the Cosmological Theory of Information and the Theory of Swirl Fields**

The resurrection as a procedure and process applied in ancient Egypt and earlier in Orpheus and the Thracians and Proto-Bulgarians-descendants of the displaced Atlanteans on the Balkan Peninsula. Here we will only look at the resurrection as a procedure applied in Egypt. The Egyptian engraving shows the instances that were used in Gepit in the resurrection procedure. This is not only a resurrection process, in which the process of reincarnations is interrupted, but also a rise to the fourth and fifth change of the soul.

The objects used in Egypt for these procedures are visible on the engraving. namely a rod about 1.20 meters long, at its end there is a camper and the other end is curved at an angle of 45 degrees (Figure 1 & 2).

Figure 1

Figure 2

According to the cosmological theory of information, which proves that the so-called point of Confucius is the point through which the soul of man can access (Figure 2).

Figure 3

In the research institute Dobrev - Halachev JSC. There have been performed experiments of testing that prove this. According to the cosmological information theory to reach the chakras of the fourth and fifth measure of the soul, vibrations should be raised. this was in Egypt with a generator (Figure 3).

According to the cosmological theory of information, when a man raises his vibrations so that under 45 degrees with a closed eye he generates a light beam with the corresponding vibrational frequency, then that light beam and his eyes - with closed eyes below 45 degrees - pass through a specific symbol - the symbol of Anch, which is also known by Atlantis and the Atlanteans. This is the symbol of the elevation and the corresponding look (Figure 3).

Another engraving that proves this process of resurrection and elevation is the graph of how Osiris resurrects. In one of Osiris' hands, he holds a hook - a rod, with a camber at one end as the rod is curved under 45 degrees. In the other hand Osiris holds a bat, which actually is a vibrator. The point is actually to stimulate the vibrational energy point of Confucius, which point corresponds to the entrance of the thread to the soul of the person concerned. Only when this cycle is closed and the stimulation of this point results in the process of elevation, in

which it is possible to stop the process of reincarnation of the soul in the next life. This is a one-time process, however, which must be in sync with the harmonized frequencies of the universe. Indeed, the pineal gland is a gateway to both the energy and information world of the universe. This portal, however, must be followed by specific procedures to be opened.

By making a comparison and analogy, all this is proved once again. Namely the system of the 8 chakras of man proves man's capabilities for these processes, namely: The three chakras of the pineal gland prove that the angle between the third eye and the chakra at an angle of 45 is the chakra number 11 passes (Figure 3). The elevation is a motion in which the vibration is lifted so much the heights are the frequencies of the fourth and fifth dimension of the dimensions that support the corresponding number of chakras - energy center of every soul. When vibrations are released at frequencies corresponding to the fifth dimension, when natural.

**Tools for Accessing the Information Field of the Universe, of the Souls, for Possible Reliquary and the Drawing of Information**

Figure 4

Figure 5

The tools actually have three (Figure 4 & 5). The first symbol is Ankh. This symbol, commonly known as "the key of life," "the Nile's key," the "life band," "the node of life," "the Egyptian cross," is called U + 2625. In the traditions of Egypt, this symbol symbolizes the birth of the life of life. This symbol combines two symbols - a cross, that is the symbol of life and a circle as a symbol of eternity. Together, the two symbols indicate immortality. This

offends the insult of the female and male deity, Osiris and Isis. It is a union between the earthly and the heavenly.

The UAC symbol denotes power. It is related to the Ankh and Jed symbols, and depicts a rod that holds Pharaohs, gods and influential faces. This rod has actually been used both as ..... and for generating the cosmic healing power, The Jed symbol actually represents a generator of precisely defined frequencies. Oi consists of a vertex, a vertical structure, a characteristic shape, and well-defined horizontal "lines" that are only four.

These four horizontal "plates" actually represent a structure for generating energy that actually accumulates between the pages. In fact, there is a standing wave - a vortex, which is a battery for energy storage. This is between the four dishes. From the base to the first plate is a method of transmitting energy. The bas-relief which includes all three symbols as well as the symbol of a snail and a vessel. The snail is a vortex wave i.e., the combination of the three symbols is a vibration generation that transmits precisely defined energy at a specific point and unlocks
