## Introduction

With the evolution of economic theories, the role and position of the state has been transformed, so that the optimal allocation of resources, economic stability and distribution of income are among the main tasks of governments. In some cases, the optimal allocation of resources between sectors and economic activities is not naturally achieved and, with the imbalance in economics, Pareto efficiency access is not possible. As well, with the implementation of the historical evolution targeting subsidies law in 2010, surgery economic transition period of economic subsidies to be economically competitive and released after two decades of waiting, operational and research on the subject from the perspective of monitoring and impact assessment after the run, has entered a new realm [5-7]. Since the of targeting subsidies has been at the head of the government's economic development plans, this project the rural community in line with its policy has affected all classes of society. In this study an attempt is made to assess the impact of implementation targeted subsidies law to the development of rural settlements the central district of Borujerd county for "run-time assessment" is checked [8].

In rural settlements around Boroujerd city, the purpose of subsidies is the emergence of social and spatial effects [9]. In order to compare the theoretical and objective issues, the

purposeful targeted of subsidies with the realities of rural society in the central part of the city, from the perspective of its impact on rural development indicators In this research, an attempt is made to evaluate the effects of law enforcement on subsidies on the four dimensions of economic, socio-cultural, environmental and physical infrastructure of rural settlements under study [10].

## The Study Area

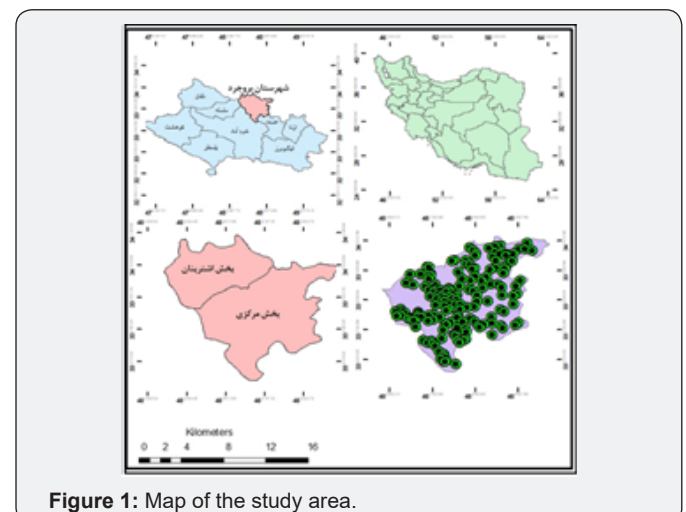

Figure 1: Map of the study area.

Boroujerd County is one of the 429 County of Iran and located on the geographical coordinates of 33°36'12"N 48°35'26"E (Figure 1).

## Methodology

Kind of research is applied and research method is descriptive and analytical research and data collection, library documentation and field that for the analysis of data from the questionnaires, the two methods of descriptive and inferential statistics (Kendall's tau-b, Spearman and multiple regression) using is. Variables to measure the level of development of rural settlements of 56 items in the 4 criteria of environmental system, social system, economic system and physical system is measured. In relation to influence the process of targeted subsidies in the territorial space and rural settlements of 38 items within 7 standards of education and awareness, knowledge and skill, empowerment, service backup production and food security, access to financial resources, partnerships and policies is measured [11-13]. Thus, by analyzing the questionnaires of sampled households in rural areas of the central district of Boroujerd County, it was clarified that the targeting subsidies on the level of development and stability of rural settlements is effective [14,15].

## Results and Discussion

Distribution of cash Transfer in many countries as one of the most important factors affecting the spatial system of the settlement, in addition to the development and structure and performance of the regions and districts, Cause improves the level of development of the indicators of the environmental, socio-economic, physical and infrastructural systems in Rural settlements [16,17]. Thus, the neglected sections of the spatial and interactive components (Targeting Subsidies) with the level of development of rural settlements in the central part of Boroujerd County, are potentials that can be effective in improving the development indicators of Rural settlements. The results show that the correlation between the targeting subsidies and the Rural Development in this area is significant [18-21].

## Conclusion

Considering the positive role played by targeting subsidies and the development of rural communities and settlements, as well as the numerous emphasis of many scholars as well as the experiences of other countries in this regard, the need for the government to promote these indicators and enhance the empowerment of local residents through the provision of credit services and Improving the rural business environment in this regard will improve the status of development indicators of rural settlements in the central part of Boroujerd county [22-24]. The findings of this study indicate that lack of proper mechanism for law enforcement of subsidies in the agricultural sector and rural community has led to the instability of rural settlements in the central part of Boroujerd city [25]. Therefore, local stakeholders, as they should have not been able to make the necessary

investments in the process of improving the process Production and employment caused by the law enforcement purpose of subsidies [26].
