## Opinion

A 28 years old lady's mother approached Heal the World with below schezoprenia symptoms

- She is hearing voices talking to her
- She is in fear all the time
- Something following her all the time
- Something touching her
- She was saying police officer raper her
- Repeat imaginary talks, haulicinations, etc.

She was based in Australia and had many times forced admission to mental hospitals. She was suffering from schezoprenia since last 3 years. In March last week 2021, her mother approached her for healing remedies.

## Our Solution

We healed her all 7 key energy centers focusing more time on crown energy center and brow energy center. We healed her key glands and balanced her chemicals during our healing. We provided the patient reiki distant healing and mexican distant healing for 63 days duration. It was around 38 minutes of healing

per day in both reiki and mexican healing. We have seen lot of changes in her behaviour during the first healing cycle 21 days. She was more calm and out of fear in the first cycle. During the second cycle of healing, her repeat imaginary talks reduced and talk on rape reduced. At the end of her 3<sup>rd</sup> cycle, we could see lot of changes in her attitude, talk, imagination and thought process. She was out of negative thought process and haulicination. There was drastic change in her face glow before initating the healing and after completion of 63 days of healing. She is still in hospital under medication. According to her mother, her behaviour with her family members is fine but with the hospital authorities she is not appropriately communicaiton. Our assesement at the end of the healing is that she needs homely care, love, affection, kindness from her family members. She can be taken out of medicines which depends on hospital authorities. Few more healings can be given to her make her mind calm and stablize her thought process. We have removed negative thoughts from her subconscious mind which should her in the future.

## Methods used in Healing

1. Reiki distant healing (using natural energy healing)
2. Mexican distant healing (using light energy healing)
3. No medicines given during the treatment
