

Case Report

A case report is a detailed report of the symptoms, signs, diagnosis, treatment, and follow-up of an individual patient. Case reports may contain a demographic profile of the patient, but usually describe an unusual or novel occurrence. Some case reports also contain a literature review of other reported cases.

Case reports submitted to Juniper journal should make a contribution to medical knowledge and must have educational value or highlight the need for a change in clinical practice or diagnostic/prognostic approaches. Case report submissions will be assessed by the Editors and will be sent for peer review if considered appropriate for the journal. Authors should seek written and signed consent to publish the information from the patients or their guardians prior to submission

Font: Cambria (Headings)

Size: 12

Title

The title of the paper should provide a concise statement of the contents of the paper. A good title is very important and will attract readers and facilitate retrieval by online searches, thereby helping to maximize citations. The title should include topical keywords and allude to the interesting conclusions of the paper. A title that emphasizes the main conclusions, or poses a question, has more impact than one that just describes the nature of the study.

Running title

- Author names should be given in upper- and lower-case, not in all capitals, to avoid ambiguities. The author for correspondence must be clearly indicated. It is permissible to include the names of more than one author as corresponding author, but a single author must act as the point of communication during the peer review process.
- The name and address of the laboratory or laboratories where the work was done, and present addresses of authors who have since moved.

Corresponding author details

Detailed Author's address, email address and telephone number for the corresponding author should be mentioned.

Introduction

This should state the objectives of the work, but should not contain a detailed summary of the results. If results are expressed as percentages, the absolute value corresponding to 100% should be stated.
