Opinion

As in my last communication in the field of Space Science I claimed and agreed with the postulate, phenomenon and hypothesis of existence of "Parallel Universes" called in lucid and brief word "Multiverse" can be defined in another word is " Set/ Collection of ALL Universes" with some references, concepts and Déjà vu examples. But again we have question mark on the basis of some expert observations and purposed space theories which claims Not a single Multiverse or Multiverse is not a final existence of ALL and again researches in space science open new door to explore more where Astrophysicist, learners, practitioners and researchers not only purposed Multiverse is not final existence of ALL space elements and we have instead of single Multiverse several "Multiverses or several sets of parallel universes" but also forms, laws, forces, formation, reactions, forces and nature would be different from one another and Nine new types of Multiverse defined as "Quilted Multiverse, Inflationary Multiverse, Brane Multiverse, Cyclic Multiverse, Landscape Multiverse, Quantum Multiverse, Holographic Multiverse, Simulated Multiverse and Ultimate Multiverse". Hence with further collecting all these types of Multiverses what form final called "Omniverse". In other word several supposed co-existing multiverses. Where I would like to define as "Omniverse is a collection or super set or ultimate set of every single Universe, Multiverse, Megaverse, Dimension and Realm with all Omniversal substance's like matters, anti-matters, black holes, worm holes, white holes and dark energy in single

confined group". Now if after defined someone raised question to me is there further possibility? And the answer is Big No, because this is the "Point of No Self-creation" at this stage Omniverse means in contrast up to the this final expansion of space called "Omniverse" is the "Point of Self-creation" with ALL possibilities and forms asteroids, planets, stars, energy stars, solar systems, galaxies, milky ways, black holes, nova, supernova, interstellar space, clusters, super clusters, universes, multiverses, megaverses to finally last at point "Omniverse: The Final Existence". To know after Omniverse just like to try to find someone who death analogically, because no one knows what after death and if knew unable to share with us. If we are looking in hierarchical order of all these elements our solar system and again in our solar system planet earth just like a tiny particle and this is the only reality. Here from lowest like stars, planets, solar systems, superclusters to biggest elements like universe, multiverse, Megaverse and finally Omniverse just based on frequencies, lights, matters, anti-matters, dark energy, forces, laws and vibrations. Hence from existence small entity like us Humankind to final set "Omniverse" we all made-up of same building blocks and in motion with same frequencies, laws, forces and vibrations and answer of them lies in theory of relativity, space and time, space and light-years, string theory, quantum mechanics and finally in "Theory of Everything". Hence explore space to explore our existence to answer unsolved question of life and space.

**Your next submission with Juniper Publishers
will reach you the below assets**

- Quality Editorial service
- Swift Peer Review
- Reprints availability
- E-prints Service
- Manuscript Podcast for convenient understanding
- Global attainment for your research
- Manuscript accessibility in different formats
(Pdf, E-pub, Full Text, Audio)
- Unceasing customer service
